

Department of Primary Industries (Victoria, Australia)

Key Benefits

- ⊕ Rapid data migration across databases ensuring data integrity with no loss of data. The whole data migration operation was performed during weekend without any hassles, avoiding any down time and loss of productivity
- ⊕ Faster time to market, by enabling smooth switching of the production system from Sybase ASE to Microsoft SQL Server
- ⊕ Time and Cost savings by eliminating unproductive manual migration effort
- ⊕ Easy to Install and Easy to Use tool with user friendly & intuitive GUI

"Your product did a great job. The SwisSQL Data Migration tool saved hundreds of hours off the project in the development stage and then enabled us to achieve the migration in one weekend. It was an invaluable tool for the project." said Geoff Collishaw, Department of Primary Industries (Victoria).

About AdventNet

Enabling Management Your Way™

AdventNet provides affordable software for database migration, management and provisioning of complex networks, systems, and IT applications. AdventNet is headquartered in Pleasanton, CA with offices in NJ, MA, India, UK, China, and Japan and has a well-trained partner base around the globe. It has over 400 employees and more than 1000 customers.

Business Challenge

Victoria (Australia) is rich in natural resources and has a strong history of primary industry development. Agriculture, mining, petroleum, fishing and forestry are all primary industries. Department of Primary Industries (DPI) works with these industries so they generate wealth and employment, and also take their environmental and social responsibilities seriously.

DPI wanted their three In-house databases to be migrated from Sybase ASE 12.0 to Microsoft SQL Server 2005. The Sybase database had farmer details like properties, animals, diseases on animals etc. The database migration involved over 100 tables and number of rows varied from just a couple of rows to six million. DPI wanted a comprehensive solution that was fast and highly user friendly ensuring no loss/corruption of data absolutely.

The Solution

DPI chose AdventNet SwisSQL migration solution for their database migration requirement. SwisSQL Data Migration tool offered the required data migration customizations coupled with a simple GUI to accomplish the database migration. All the tables and its records were migrated successfully saving enormous amount of time.

About Department of Primary Industries (Victoria, Australia)

DPI was established in December 2002 after bringing together a number of areas from the former Department of Natural Resources and Environment (DNRE). The Department promotes the sustainable development of primary industries for the benefit of all of Victoria. The Department supports the agriculture, fisheries, petroleum, minerals, energy and forest industries in Victoria. DPI uses a collaborative approach to influence improvements in industry performance and to encourage the adoption of new technologies and development practices. It does this by using its expertise in science and technology to provide information and advice on the use and management of resources. DPI also assists industries by running a range of community education and extension programs.

DPI employs over 2500 staff who work from more than 80 locations across the State. For more information visit <http://www.dpi.vic.gov.au/dpi/index.htm>
